

200-301 – CCNA – Cisco – Implementing and Administering Cisco Solutions (CCNA) v1.0

Implementing and Administering Cisco Solutions (CCNA) v1.0

Cisco 200-301 CCNA

The NEW 2020 CCNA

3a Kypca

- The **Implementing and Administering Cisco Solutions** (CCNA) v1.0 course gives you a broad range of fundamental knowledge for all IT careers. Through a combination of lecture, hands-on labs, and self-study, you will learn how to install, operate, configure, and verify basic IPv4 and IPv6 networks. The course covers configuring network components such as switches, routers, and wireless LAN controllers; managing network devices; and identifying basic security threats. The

course also gives you a foundation in network programmability, automation, and software-defined networking. This course helps you prepare to take the **200-301 Cisco® Certified Network Associate** (CCNA®) exam.

Цели – Какво ще научите (Course Goals):

- After taking this course, you should be able to:
 - Identify the components of a computer network and describe their basic characteristics
 - Understand the model of host-to-host communication
 - Describe the features and functions of the Cisco Internetwork Operating System (IOS®) software
 - Describe LANs and the role of switches within LANs
 - Describe Ethernet as the network access layer of TCP/IP and describe the operation of switches
 - Install a switch and perform the initial configuration
 - Describe the TCP/IP Internet layer, IPv4, its addressing scheme, and subnetting
 - Describe the TCP/IP Transport layer and Application layer
 - Explore functions of routing
 - Implement basic configuration on a Cisco router
 - Explain host-to-host communications across

switches and routers

- Identify and resolve common switched network issues and common problems associated with IPv4 addressing
- Describe IPv6 main features and addresses, and configure and verify basic IPv6 connectivity
- Describe the operation, benefits, and limitations of static routing
- Describe, implement, and verify Virtual Local Area Networks (VLANs) and trunks
- Describe the application and configuration of inter-VLAN routing
- Explain the basics of dynamic routing protocols and describe components and terms of Open Shortest Path First (OSPF)
- Explain how Spanning Tree Protocol (STP) and Rapid Spanning Tree Protocol (RSTP) work
- Configure link aggregation using EtherChannel
- Describe the purpose of Layer 3 redundancy protocols
- Describe basic WAN and VPN concepts
- Describe the operation of Access Control Lists (ACLs) and their applications in the network
- Configure Internet access using Dynamic Host Configuration Protocol (DHCP) clients and explain and configure Network Address Translation (NAT) on Cisco routers
- Describe basic Quality of Service (QoS) concepts
- Describe the concepts of wireless networks, which types of wireless networks can be built, and how to use Wireless LAN Controllers (WLCs)
- Describe network and device architectures

and introduce virtualization

- Introduce the concept of network programmability and Software-Defined Networking (SDN) and describe smart network management solutions such as Cisco DNA Center™, Software-Defined Access (SD-Access), and Software-Defined Wide Area Network (SD-WAN)
 - Configure basic IOS system monitoring tools
 - Describe the management of Cisco devices
 - Describe the current security threat landscape
 - Describe threat defense technologies
 - Implement a basic security configuration of the device management plane
 - Implement basic steps to harden network devices
-

Курсът е предназначен за (Audience):

- Entry-level network engineer
 - Network administrator
 - Network support technician
 - Help desk technician
-

Формат на курса

Присъствен Курс

Онлайн (Live)
Отдалечен

Език на курса: български (английски е наличен като опция)

Учебни Метериали: в електронен формат (Учебните материали са на английски), включени в цената с неограничен достъп.

Лабораторна среда: всеки курсист разполага със собствена лаб среда, където се провеждат упражненията, част от курса.

Завършен Курс

Продължителност

- 5 работни дни (понеделник – петък 09:00 – 17:00)

или

- **40 уч.ч. обучение (теория и практика) в извънработно време с продължителност 4 седмици**
- събота и неделя 10:00 – 14:00, 14:00 – 18:00, 18:00 – 22:00
- понеделник и сряда 19:00 – 23:00

- вторник и четвъртък 19:00 – 23:00
-

Плащане

Заявка за издаване на фактура се приема към момента на записването на съответния курс.

Фактура се издава в рамките на 7 дни от потвърждаване на плащането.

Предстоящи Курсове

- There are no upcoming events.

За повече информация използвайте формата за контакт.

Ще се свържем с Вас за потвърждаване на датите.

Предпоставки (Изисквания) за Участие (Prerequisites):

- Before taking this course, you should have:
 - Basic computer literacy
 - Basic PC operating system navigation skills

- Basic Internet usage skills
- Basic IP address knowledge

There are no formal prerequisites for CCNA certification, but you should make sure to have a good understanding of the exam topics.

Курсът подготвя за следните сертификационни нива

- This course helps you prepare to take the **200-301 Cisco® Certified Network Associate (CCNA®) exam**. By passing this one exam, you earn CCNA certification.
- IT-Training.pro провежда изпити за сертификация. Може да се явите за своя изпит 200-301 при нас.
