

MS-700 – Microsoft – Managing Microsoft Teams (MS-700T00)

Microsoft Official Course (MOC)

Managing Microsoft Teams (MS-700T00, MS-700T00-A)

3a Kypca (About this Course):

- The Managing Microsoft Teams course is designed for persons who are aspiring to the Microsoft 365 Teams Admin role. Microsoft Teams admins configure, deploy, and manage Office 365 workloads for Microsoft Teams that focus on efficient and effective collaboration and communication in an enterprise environment. This course covers six central elements – Microsoft Teams overview, implementing governance, security and compliance for Microsoft Teams, preparing the environment for a Microsoft Teams deployment, deploying and managing teams, managing collaboration and managing communication in Microsoft Teams. In Microsoft Teams overview, you will get an overview

of Microsoft Teams including Teams architecture and related Office 365 workloads. You will be provided an overview of security and compliance in Microsoft Teams and finally get an overview of how to manage Microsoft Teams. In implementing governance, security and compliance for Microsoft Teams, you will plan and configure governance for Office 365 groups including expiration and naming policies. Then you will implement security by configuring conditional access, MFA or Threat Management for Microsoft Teams. Finally, you will implement compliance for Teams by using DLP policies, eDiscovery cases or supervision policies. In preparing the environment for a Microsoft Teams deployment, you plan an upgrade from Skype for Business to Microsoft Teams by evaluating upgrade paths with coexistence and upgrade modes, manage meeting migrations and configuring coexistence and upgrade settings. Then you plan and configure network settings for Microsoft Teams, and finally you will deploy and manage Microsoft Teams endpoints. In deploying and managing teams, you will learn how to create and manage teams, manage membership and access for both, internal and external users. In managing collaboration in Microsoft Teams, you will manage chat and collaboration experiences such as team settings or private channel creation policies. Finally, you will manage settings for Teams apps such as app setup policies, Apps, bots & connectors in Microsoft Teams or publish a custom app in Microsoft Teams. This course concludes with managing communication in Microsoft Teams. You will learn how to manage Live event and meetings experiences, manage phone numbers or Phone System for Microsoft Teams and finally how to troubleshoot audio, video, and client issues.

Цели – Какво ще научите (Course Goals/Skills):

- The Microsoft Teams Administrator configures, deploys, and manages Office 365 workloads for Microsoft Teams that focus on efficient and effective collaboration and communication in an enterprise environment. The Teams Administrator must be able to plan, deploy, and manage Teams chat, apps, channels, meetings, audio conferencing, live events, and calling. The Teams Administrator is also responsible for upgrading from Skype for Business to Teams. The Teams Administrator collaborates with Telephony engineers to integrate advanced voice features into Microsoft Teams. This role is not responsible for configuring direct routing, configuring call routing, or integrating telephony. The Teams Administrator may work with other workload administrator roles, including security and compliance, messaging, networking, identity, and devices.

Курсът е предназначен за (Audience):

- The Teams Administrator has a fundamental understanding of integration points with apps and services, including but not limited to SharePoint, OneDrive for Business, Exchange, Azure AD, and Office 365 Groups. The Teams Administrator understands how to integrate external apps and services.
